

Carrot SUPER NANTES IMPROVED

Daucus carota L.

"The earliest variety!"

Super Nantes Improved has very early maturity and can be harvested 85 days after seedling. The length of roots is also remarkable and can reach more than 20 cm. Finally, vigorous foliage gives a good tolerance to Alternaria and good protection for cultivation in rainy seasons.

Root

- Cylindrical
- 20 to 21 cm long
- Deep orange color outer skin
- Middle orange core with a thin demarcation
- Very small spot

Plant

- Vigorous
- Good tolerance to Alternaria Leaf Blight

Maturity

- 85 to 90 days after sowing
